How Do You Simplify Financial Processes in the Global Energy Business?

“We are committed to creating a cleaner, greener world. Technology plays a crucial role in making that possible. When it comes to business analysis, **our time needs to be focused on interpreting the numbers – not just on generating them.**”

Alain Bernard, Common Finance Product Owner, ENGIE

SAP® Solutions

SAP S/4HANA®, SAP S/4HANA solution for central finance foundation, SAP Fiori® user experience (UX), SAP® MaxAttention™ services, SAP Master Data Governance application, and SAP Business Planning and Consolidation application

As part of its Common Finance Program, global energy provider ENGIE deployed SAP S/4HANA to integrate its ERP systems and simplify financial processes. Now, all of the group's entities share a single chart of accounts, a robust analytical framework, and simple, standardized rules for finance functions.

Before: Challenges and Opportunities

- Simplify finance processes by driving the convergence of processes, data, and systems
- Increase efficiency by implementing new solutions that enhance automation and strengthen the finance organization's position as a trusted partner of the company's business units
- Harmonize data and systems to help global business services become more efficient and extend their scope

Why SAP

- Offered integration of ERP systems worldwide, helping to create a shared understanding of how business performance is measured across the ENGIE group
- Made analyses and reports available online at the group level as well as by local entities
- Automated processes, such as intercompany reconciliation and management reporting, allowing management in real time
- Simplified the user interface with the SAP Fiori UX
- Enabled smooth adoption of new and complex design approaches with the help of SAP MaxAttention

After: Value-Driven Results

- Greater transparency with continuous financial reporting, including on cost of sale and margins
- Simplified IT landscape, standardized financial processes, and the creation of "golden rules" – driving coherence, increasing productivity, and making ENGIE more adaptive to change
- Streamlined and more efficient financial processes, enabling ENGIE to better manage its transformation toward a new business model based on responsible growth

“Thanks to integration through SAP S/4HANA, we have one chart of accounts and a shared analytical framework for all business organizations within the ENGIE group.”

Thierry Langer, Finance Division CIO, ENGIE
